1. YEARLY PROGRESS TOWARDS SUSTAINABLE DEVELOPMENT

Year 2005-2006

1,000 families were given training on Fuel Efficient Stove Cooking technology and more than 620 families prepared FES cooking stoves at their household level in 20 villages of Jati area through WWF- Pakistan.

Year 2006-2007

- 100 Nadi filter unit distribution among rural families in Jati for first time, made to safe and clean drinking water accessible through the support of ADP Association for the development of Pakistan.
- 60 Nadi filter water unit distribution among poor families in Hyderabad areas for access to safe and clean drinking water the support of Hope of Children UK.
- 70 Nadi filter units promotion in Hyderabad and Jati area through self support for the promotion of safe drinking water among poor rural communities.

Year 2008

- 500 Nadi filter water unit, fuel for efficient stove 20 Mosquito nets distribution among poor families in Jati area first time for access to safe and clean drinking water through the support of Misereor Germany.
- Research conducted on safe drinking nadi filter of 100 Nadi Filter Unit to see the biological analysis of Nadi filter within 8 month time period.

Year 2009

- Village development activities implementation in 150 families through German Consulate General Karachi for 05 villages of Sajawal area district Thatta.
- 200 Nadi Filter units prepared for the 10 UCs of Sawabi district for the IDPs and host communities of IDPs of Malakand division during July to August 2009.
- 400 Water coolers distribution among the Sikh IDPs of Gurdwara Nankana Sahib.
- 26 Govt. Primary schools were provided with the Tooth Brushes, Tooth pastes and Shampoo Sachets for the health promotion among school children.

Year 2010

- Training with HANDS in Karachi Kachi Abadies on fuel efficient stove and Nadi filter TOT in Jan-Feb2010.
- Training with OSDI on Nadi filter in old hala on Nadi filter training among 100 families.
- Implemented 600 Nadi filter project WHO support at Mansehra District.
- Support 10,768 families affected by flood 2010 by providing them with food, non food items, health kits and medical care.
- Promotion of safe drinking nadi filter unit in 3,200 families.
- Provision of tent/shelter to 780 flood affected families.

Year 2011

2) Organized medical Camps and facilitated with free medicines.
3) In the emergency phase AHD distributed FOOD & Non FOOD items among 2000 families of most affected union councils of district BADIN, Tando Muhammad Khan, and Mirpurkhas.
4) AHD developed CBO’s in Jati for Rehabilitation work for sustainable development such as provision of Seeds, Goats, and trained them for kitchen gardening.
5) AHD also organized workshops about Health & Hygiene, FES, Nadi Filter and on organic Agriculture.

---

Yearly Progress Progress

- [Yearly Progress Chart]

---

[Logo]
First of all I would like to wish you all a happy New Year 2012, hope this year bring a lot of hope and happiness amongst flood effected families who have suffered a lot during last year 2010-11 and had the most difficult phase of their lives. Start of year 2011 was full of worries as hike up in oil prices which resulted as an increase in food prices as well and it became difficult for poorer communities to even buy wheat and other basic food items.

We at AHD look forward to support around 15,000 families bring them back to food security at their house hold level improving their standards of life.

We are also looking for support from local, national & international communities to help and support these poor rural families, who got affected by floods 2010-2011 in which they lost their houses, crops and livestock on a large scale.

We at AHD are determined to support poorer communities with safe drinking water and AHD VDM model activities at their door step so that poor communities can have access to safe and clean drinking water and basic human needs access at their villages level. Village development model activities can bring quick change in the poor rural communities of Pakistan. In this regard, we appeal to all humanitarian actors to support and promote our project activities for the flood victims of 2010 & 2011 so that the quick support can be provided within a short time period.

Let us spread the light of joy and progress as it's every citizen's right.

Warmest Wishes,

A. KHURSHID BHATTI
President / CEO
3. INTRODUCTION OF AHD

“Association for Humanitarian Development (AHD)”

Association for Humanitarian Development (AHD) is a social community based organization was established in December 2001-2002 and registered under the Societies Registration Act: XXI of 1860 on 17 May 2003. The main Objective of the AHD is to work for the Peace, Justice, Harmony and equality through the participation of most disadvantaged and marginalized communities for the sustainability as a whole. At initial stage 2004 to 2010 awareness programs campaigns conducted in poor rural communities along with medical camps and fuel efficient cooking stove construction in poor families using wood for cooking purposes. During 2001 to 2005 AHD team covered almost 500 families in Sujawal, Matli & Jati Tehsils.

In the year 2006-2007 AHD staff and board members sat together and set target for the promotion of new re-innovated Nadi filter technology & VDM Village Development Model in rural village communities deserving and are in need. From 2007 to 2011 AHD was successful enough to introduce Nadi filter in more than 15,000 families through other NGOs and CBOs and cooking stove in some 3,700 families.

**Vision**

To bring Peace, Justice, Unity and Harmony for all and to ensure availability of food and equal distribution of natural resources among the marginalized communities.

**Mission**

Mobilizing and motivating vulnerable people through different programs and projects, moving them to wards sustainable development.

**Goal**

Promotion of self-help activities through capacity building among the vulnerable/poverty stricken communities towards sustainable development.

**Tools**

Door to door visits, Awareness Workshops, Seminars, Meetings, Exposures and Registration of SHG/CBO/CCB etc.

**Terms**

Community’s Participation

6. FLOODS 2011 & AHD EARLY RESPONSE

In a moment, an outbreak of flood or the threat of turn out driving millions from their homes, tearing apart families and destroying communities. When catastrophe hit in 2010 and 2011 the Association for Humanitarian Development was often one of the first humanitarian organization on the scene- providing rapid and effective aid that persisted, reducing suffering, restoring dignity assuring complete recovery. AHD emergency response is one of the Sindh’s recognized strength and capacity has placed us on the frontline since last year 2010 floods in District Thatta and its talukas Jati & Sehwan.

The torrential rains of September 2011, resulted in destruction of 16 districts of the Sindh, severely damaging them and Government declared emergency in the province. AHD Relief & Rehabilitation team visits to various badly affected districts made a difference from rescuing women, children and senior citizens to even accommodating them to the safer places.

AHD, Emergency Rescue team comprises of 6 specialists having expertise in their key areas, necessary to assess the critical survival and mount an effective response to sudden or protracted emergencies. The team comprises Program Manager, Senior Program Officer, and Doctors with paramedics and WASH specialist for the rescue of affected victims of heavy rainfall. There are also focal person for identification of most affected areas.

AHD coordinated with DCO of districts and reached communities and provided help in shifting them to nearby IDP’s places. Program Manager and Program Officer along with Para medical Staff were determined on provision of emergency medication and seasonal viral precaution and other treatments. Mr. Ashraf Sardar Senior Program Officer deputed at Matli office visited union councils Kadi Qazi, Peru Lashari, U.C 1 & 2 and worst hit union council DUBI of Taluka Shaheed Fazal Rahoo of District Badin & completely catered them with Food, Non Food items, WASH and organized mobile medical camps. Mr. Anf Emmanuel, the focal person of AHD Matli office identified the areas in the vicinity of main high way and rescued people from there. The AHD team moved towards the targeted communities to support.
7. REHABILITATION OF FLOOD VICTIMS THROUGH AHD VDM VILLAGE DEVELOPMENT MODEL

Floods 2011 devastated large no. Of families & almost 4.82 million populations was affected by super floods in Lower Sindh, thousands of houses were destroyed or submerged in floods water. Approximately 100% crops & Livestock damaged, & people were short of food & water. In snaps below the situation of floods and the condition of poor flood affected families can be seen. AHD started their rehabilitation and successfully implemented one of project with Help Alliance in 15 villages of Jati area districts Thatta and provided them with safe drinking water, safe cooking stoves, goats for livestock promotion and medical health at their door step. The project was successful and brought quick change in about 500 families.

Rehabilitation Impact on villagers

NADI FILTER

Before

Villagers drinking flood water and condemned water

After

Villagers are trained for construct Nadi filter and drink filter water

FUEL EFFICIENT STOVE

Before

Women cooking food with smoke and use lot of wood. Smoke affect of health and wood affect on health and environment

After

Women are happy with Fuel efficient Stove. No smoke, less wood burning.
RICE SEED

Before

Farmers have no seed for coming Rice crop

After

Farmers growing Rice seed and getting good result, also saved for next crop season

GOAT SCHEME

Before

Villagers have no live stock, No Milk

After

Villagers have their own goats, they use milk and very happy

HEN SCHEME

Before

Villagers have no hen for eggs they are weak they need nutrition

After

Villagers have their own hens for eggs, getting nutrition

KITCHEN GARDENING

Before

Villagers no kitchen, they purchase vegetable from market waste money and time

After

Farmers growing rice seed and getting good result, also saved for next crop season
### Annual Report 2011

#### MOSQUITO NETS WATER COOLER

**Before**: Villagers have no mosquito nets. They are affected from malaria. They have no place for water storage.

**After**: Villagers have 2 mosquito nets and 1 water cooler.

AHD implemented its projects more efficiently and effectively into the targeted communities to meet its set goals. 2011 AHD initiated 7 projects for the sustainable development of the community through its qualified and expertise staff of desired field. AHD targeted the district Thatta, and Badin Talukas which were worst affected in 2010 and 2011 rain.

By the grace of Almighty AHD accomplished the projects with its desired results and formed Male & Female CBO's for the future development of the villages.
9. AHD HEALTH PROGRAM & MOBILE CLINIC

Introduction: AHD started health imparting activities in the year 2010 among the flood victims after a serious urge for help was felt. Our initial health efforts included Awareness programs among the communities along with prevention and control of the diseases which had already prevailed among the masses at large. In year 2010 alone about 13000 people benefited from the health campaigns through various mobile medical camps. AHD with another health partner organization HAYAT-e-NAU organized about 5 medical camps in JATTI in the month of December.

AHD alone conducted about 19 free medical camps in Tando Hafiz Shah and 11 medical camps in JATTI. Year 2010 was an eyeopener for many organizations we ended this year with many pledges and well drafted health plans.

IN 2011 AHD was firm and determined to impart health to the concerned areas. Unfortunately Floods and rains were unforgiving this year as well, with Jati, Sujawal, Thatta, Tando Mohammad khan, Tando Bago, Shaheed Fazal Raho piercingly affected.

AHD carried about 28 medical camps in JATTI, 11 in Tando Hafiz Shah and about 18 camps in various areas of Dsst: Badin. We had our mobile medical clinic by our own vehicle, courtesy: Lufthansa Airline) to cater the needs of the affected individuals and families at their doorstep. More than 10,000 people in 2011 received medical help; patients from all age groups were seen by our doctors. Among the seen, patients with skin pathologies were noticeable with bacterial diseases (folliculitis, impetigo) and scabies being their companions for an unknown time. Waterborne diseases followed next with gastroenteritis, typhoid fever, cholera and plain diarrhea toping among this group. Malaria continued to pose a major threat as ever.

Women in general and in their gestational periods presented with iron deficiency anemia and complained of general body weaknesses and fatigue.

Children mostly presented with discharging ears and otitis, malnutrition and being underweight drew our maximum attention.

The medical camps were successful. Proper assessment was done the individual problems were sorted out. Medical advice was given along with proper counseling of individuals and their families.

General Hygiene awareness and health education was imparted.

Medicines such as Multivitamins, Iron supplements, Mineral supplements, specific antibiotics, skin ointments and insect repellants were provided Oral rehydrating formulas were distributed among masses at large. A lot of people were benefited from this effort of AHD.

AHD organized medical camps in different districts during rain and DCO Badin coordinated with AHD and appreciated its efforts and allowed to cover whole union council DUBI and Korwah and provide assistance for any kind of access to the targeted areas.
Health Program, Plan’s for 2012:

1. Health awareness remains to be the prime target that has to be achieved by AHD. Arranging workshops and educating people about simple hygiene methods in their regional languages. Educating women about safe motherhood and maintaining their personal hygiene during pregnancy are the areas AHD pledges to work in.

2. Educating the Technical Birth Attendants (TBA’S) is another important task that AHD plans to carry out in 2012. This effort will not only reduce the neonatal death but also reduce the rate of sepsis, abortions and other infections which are a result of lack of hygiene maintained during deliveries.

3. Arranging Medical camps not only to see the patients and cure their ailments but also to identify the needs of suffering people, checking for the prevailing diseases and to come up with solutions and disease preventing methods remains to “the target” for our team.

4. Coordinating with the Tehsil( local) government in mobilizing the health efforts at our par excellence has always been AHD’s focus, so that masses at large get the maximum benefits.

5. Setting up a permanent OPD with fist aid facilities in JATTI for people living there and in the vicinity..

6. Setting up a BASIC HEALTH UNIT is a dream for AHD in 2012 and we all are working towards making this dream turn in to a reality.
10. SAFE DRINKING NADI FILTER PROMOTION IN FLOOD AFFECTED AREAS

Nadi filter units promotion in Flood affected families of Thatta, Tando M. Khan, Badin and Mirpurkhas districts for access to safe and clean drinking water at household level.

Introduction: After Flood 2010-2011 a large area was deprived of drinking water, mostly people were drinking flood contaminated water.

Action Plan: AHD staff visit village to village Rapid Survey and saw that people were drinking flood water or brackish water. AHD mission is providing more and more safe water so AHD staff quick response was to arrange Nadi filters for safe drinking water.

Working Areas: Matli, Jati, Mirpur khas, Tando Hafiz shah, Bulri shah kareem

11. CASE STUDIES

NADI FILTER

- My name is Ghani Khan Resident of Jati area. I have five kids a brother and a Wife. Before Nadi Filter installation, we drank Canal water. Canal water was very dangerous, my family suffered with different water borne diseases throughout the year. They complained of Diarrhea, Vomiting and Sometimes even bloody stools which made me very helpless because of that our health deteriorated with each passing day. Financially I could not and still cannot afford treatment expenses of the disease spread by the contaminated water. AHD team conducted survey and shared awareness about the importance of safe and clean drinking water. The information they shared was very helpful and transforming Ghani Khan is personally very thank-ful to AHD staff. For visiting them and helping them out with their biggest health concern of unclean water. Khan was very happy with the Nadi Filter. He couldn’t imagine that access to clean water to could be so simple and for free. They wish that AHD will continue the support with the latest technique for the betterment of their villages.

Case Study of Mrs Maya Jitu

Mrs. Maya jitu age 50 years resident of village Nodhani. The village has 60 families and they are using tradional stoves for cooking. The Health of village women has been affected from major problems as smoke has affected the eyes of the women and even some women have developed the Asthma problem. The tradional stove has got no chimney and proper space for exhaustion of smoke. Since AHD introduced their (FES) fuel efficient smoke less stoves, health of village women is improving because this stove have chimney and consumes less woods two stoves at the same time can be po erated, time consumption also reduces and the major point of this is that the fire hazard in their house hold has declined.

Mrs. Maya’s thanks:

I personally am very thankfully to AHD Staff for introducing this stove to us and making us aware of benefits and being a village woman I will try to continue this process and train other village women as well.
Shanti Devi, resident of village Walji Kohli, Taluka Tallar, District Badin. Her family was facing dreadful situation after 2011 floods. Shanti lived as an IDP in nearby school of her village. On daily basis she fetched water from nearest canal. And the water she fetched after a lot of difficulty was stagnant, contaminated and harmful for her family. Walji Kohli is small village of 25 households. Villagers lost the crops, assets and livestock and 100% of their houses damaged during flood situation. The villagers are still using canal water for all purposes (except drinking) which is badly contaminated after floods. Shanti herself was facing digestion related problems such as abdomen pain and she told us about other villagers that who also were suffering from such ailments like Diarrhea, and different kind of skin diseases. AHD Relief & Rehabilitation team immediately visited Shanti’s village and organized meeting and identified basic urgent needs, which is SAFE CLEAN DRINKING WATER on priority basis. AHD Safe clean drinking water program team arranged training on BIO SAND NADI FILTER with the help of Shanti and selected 20 females for TOT training of BIO SAND technology. So Shanti learnt the techniques and installed Nadi filter at her house, and after within a week installed 20 Nadi filter all over the village. Now Shanti feels secure after using BIO SAND NADI FILTER water for drinking purpose. She is very much thankful to AHD team who rescued her, and her fellow villagers from different kind of viruses and organisms causing water borne diseases through just using newer and simpler idea of properly SAND and Nadi.
12. DONOR & PARTNER VISITS, GUESTS

News/Partner visits:

1. Mr. Shakeel Qureishy from WWG group Karachi and Mr. Herning Carsten from Help Alliance conducted monitoring visit on 22th Feb 2011 visited AHD targeted villages at Sujawal Tehsil District Thatta Sindh Pakistan

2. Mr. A. Khurshid Bhatti & Family attended Farewell Greetings from Gudrun Haider on June 6, 2011 at Consulate General of Germany Karachi, during farewell meeting with Dr. Christian Breacht, Counsel General of Germany for the future community development project.

3. WHO EH Team (Mr. Mahmood A. Thatta & Kashif A. Jan) also made the Monitoring and Evaluation visit to the targeted area of the said project and found successfully completed with properly functional Bio-Sand Nadi Filters in the House holds monitored with remarkable response from the slum dwellers community in Mansehra district of KPK.

4. Mr. A. Khurshid Bhatti & Mr. Samson Joseph conducted monitoring to AHD Field office Mansehra from March 15th to 30th 2011, visited slum areas and facilitated in installation of 600 Nadi filter units in slum dwelling families of Mansehra district.

5. Mr. Frank Falkenberg, consultant for Misereor Germany visited AHD head office on 30th Nov 2011 and met with A. Khurshid Bhatti & project staff over discussion Misereor projects during floods 2011,
Staff Trainings:

1. More than 43 community mobilization trainings conducted in Jati, Matli & Sujawal and around 24 new women and men CBOs organized in flood affected areas. The purpose of community mobilization is to build their capacity to implement incoming rehabilitation projects.
2. Camp Coordination Camp Management Training organized by IOM / UN OCHA shelter cluster on 30th September to 2nd October 2011 at Indus Hotel Hyderabad attended by Mr. Geoffrey Parmar.
3. Training on Proposal Development & Resource Mobilization organized by NRSP Jamshoro on 8th to 10th December 2011, attended by Mr. Geoffrey Parmar.
4. Climate Change & Environment Degradation Risk and Adaptation Assessment organized by CEDRA and Tear Fund UK on 26-30 April 2011 at Rattanabad Mirpurkhas attended by Mr. Ajaz Bhatti and Mr. Masroor Solangi.

Welcome to New Staff

1. Ms. Sarina Feroze, joined AHD office as Assistant Accounts officer, on Sept 1st 2011, she is working and helping in accounts and administration matters.
2. Mr. Clement John, formerly volunteer of AHD, joined as a social Mobilizer for Lahore office from Oct 1st 2011 and working for girls education and health promotion in mother & child in slum areas of Lahore, Punjab.
3. Miss. Shumaila Khurshid, formerly volunteer, now joined as a Provincial Director for women program at Lahore office since Nov 1st 2011.
4. Mr. Asad Bhatti, joined AHD team on Nov 1st 2011 as program officer for relief & rehabilitation projects at Tando M. Khan and Matli.
5. Dr. Sarah Walter, Joined AHD health program on Dec 11th 2011, within short time she organized medical camp and supported in other programs reports, Dr. Sarah is instrumental in her work.
We welcome all of you with warm wishes from all AHD staff and hope your experience with us will be fruitful for you.

Cluster Meetings attended in response to Flood 2011

1. Shelter Cluster: 21 Shelter cluster meetings in district Badin, Tando Muhammed Khan and General Coordination Meeting in Hyderabad and submitted proposal according to given guide lines.
2. WASH Cluster: WASH cluster meeting were attended 18 meetings in district Badin, Tando Muhammed Khan and General Coordination Meeting in Hyderabad and submitted proposal according to given guide lines.
3. Food Security Cluster: AHD staff attended 13 food security meeting district cluster in district Badin, Tando Muhammed Khan and General Coordination Meeting in Hyderabad and submitted proposal according to given guide lines.
4. General Coordination meetings: AHD staff meeting were attended 07 General Cluster meetings in district Badin, Tando Muhammed Khan and General Coordination Meeting in Hyderabad and submitted proposal according to given guide lines.
13. AHD LAHORE OFFICE ACTIVITIES:

After working for many years for rural Sindh, AHD decided to work for Southern Punjab as well and initiate new development programs for poor communities and help them have a better living. AHD Lahore was established in Nov 2011, during initial few months of its establishment survey reports were carried out in different villages like:

- Narwath
- Yonabad
- Arifabad

Slum areas of Lahore and southern Punjab

AHD Lahore is initiating projects:

- Girl’s Educational project
- Safe drinking water
- Health and hygiene
- Skills development
- Women empowerment
- Kitchen gardening etc

We aim to support rural women develop skills that not just help them play a better role domestically but also add to the financial aspect of their families as women are 54% of the world’s population.

In 2012 AHD Lahore will be incorporating a Model village in order to show how we aim to develop our projects in Punjab and make them sustainable for longer run. This model village will have complete display of our above mentioned projects, their implementation showing the outcomes of our dedicated team work.

In 2012 New projects for girl’s education and women skill development will also be implemented in partnership of US AID and other donors.

Christmas Celebrations at AHD Lahore

In Dec 2011, Christmas was celebrated with poor communities; gifts were also distributed on AHD behalf in order to share the happiness and joy of Christmas. Gifts included Shawls, Mufflers and sweets for women, gents and children.

Place : Youhanabad No.2
No. of Gifts : 194
Gathering : Children, adult males, and females
Representatives : Shumaila Khurshid, Clement John
Day : 23rd December, 211 at 7.30 pm till 11.00 pm

Ikhteyar-e-Masih Church were having Christmas tablo, carol singing and comedy program prepared by the Sunday school students on December 23, 2011. The program started at 7.30 pm. Since for the gifts distribution and the introductory speech we were given time in the end of the program so we reached there at 8.30. Program was in progress. We attended a tablo and a welcome dance.

Mr. Clement said that Christmas is a season of blessings, love and care. It is a season of sharing and caring. It comes with a new message to mankind, the message of love and care for our fellowmen and at AHD we are trying to take care of and help mankind by assisting them in their problems of life.
14. GLOBAL GIVING PROJECTS ONLINE

Immediate Relief for Pakistan Flood Victims 2011
Pakistan faced another episode of floods in Lower Sindh and sea intrusion in coastal belt. 4 district Badin, Tando Mohamed Khan, Mirpurkhas, Naukot & Umerkot. District Badin is most affected by recent floods, more than 350,000 people displaced from their homes due to rain water and residing on roads & open air will be provided with food and medicine till the flood water goes down. the project will provided immediate relief for 1,000 families

Girl Effect Fund for Sindh Pakistan
Pakistani Women and Girls
AHD working in rural areas of Lower Sindh Pakistan, the target families are poor farming communities, where women literacy is very low with no girls education facility in the villages, AHD wants to provide facility for the young girls education and livestock support in 1,000 girls in Hyderabad, Thatta & Badin areas through provision of books, school dresses, female goat for her milk and girls development schemes and courses. The project will focus most poor families in Pakistan.

Safe Drinking Water for Flood Victims in Pakistan
This project will provide immediate support for 6,000 families through clean drinking water, mosquito nets and water coolers for safe drinking water as well as hygiene promotion to save 60,000 households.

Food & Medical Relief for Flood Victims Pakistan
Pakistan Flood Victims 2010 are in difficult position, we at AHD through this project will support women and children at their door step for provision of medical care & medicinal support to 8,000 households & about 1,000 families will be benefited from this activity. AHD medical staff will also take care for the provision of nutritional food to pregnant women in rural of Thatta district affected by floods 2010.

Women Sewing & Skill Training Center Pakistan
The Hari camp is a place of landless tenant farmers released from landlord’s jails and are now residing in a camp near Sikandrabad Kotri. Urgent support is needed for women and girls.

Cooking Stoves for Flood Victims in Pakistan
Heavy floods hit the Jati and Sujawal area and all 30 villages were submerged in flood water. This project in necessary to rehabilitate the flood victims with a safe cooking environment.

20. CONCEPT PAPER

Village Development Model (VDM)

Association for Humanitarian Development (AHD)

With the long deeper research, Association for Humanitarian Development (AHD) organization developed Village Development Model (VDM) which consists of seven activities, in the year of 2005-2006 in consultation with the staff members of AHD and Board members according to the need of community to eliminate the causes of poverty among the poverty stricken people. In 2006-2007 AHD introduced VDM model, through the base of some activities implemented in villages of Jati area and results life changing impact in the community at Jati area. After implementation of the said Model activities the changes/results are positive, quite visible and satisfactory. Now we take this opportunity to introduce/present the same with your esteemed organization. The following seven components/activities of the VDM Village Development Model consisting innovative and local based techniques to promote local resources and community mobilization as well as indigenous knowledge among rural poor communities within a specific time period, the purpose of the innovative VDM establishment is to promote sustainable rural development in far and scattered rural area of Lower Sindh are vulnerable or drought affected.

The Village Development Model Activities are:
1. Women Group/Organizing CBOs/SHG
2. Women Adult Literacy Centers
3. Promotion of Useful Animals Breads
4. Kitchen Gardening at Household level
5. Safe Drinking Water through Nadi Filter
6. Fuel-Efficient Stoves Cooking Technology
7. Vocational Trainings (Tailoring, Barber, Blacksmith, Carpenter &Rally making)
8. Low cost latrines
   (Barber, Tailoring, Carpenter, Blacksmith, Ralli Making and Carpenter)
   Apprenticeship schemes for the promotion of the local indigenous skills
   • Carpenter
   • Tailor Master
   • Tyre Puncture
   • Mechanic motorcycle etc
   • Embroidery
   • ETC other local skills
Impact of the Village Development Model (VDM):

- On the completion of the project they can be able to run their own micro projects through village based CBO in their village and will be able continue the project activities.
- Skills transferred among the beneficiaries.
- They will be organized and able to take decision on village level.
- Interfaith harmony will be promoted.
- Thinking process will begin among villagers.
- Coordination/communication improved among the beneficiaries.
- Adult Literacy School will be constructed in their village and will be use full for subsequent generation.
- Schools will be used as a Place where they can sit/gather for any development activities in their village which previously not in practice.
- Reading/writing/counting capacity will be increased among the Women.
- Identification of their basic needs and wants.
- Promotion of marketing.
- Long term relief from the money lenders.
- Improvement in health condition through safe drinking water, Smokeless Stoves and Kitchen Gardening to getting fresh vegetable.
- Able to sensitize government to solve their problems.
- Strong linkages will be developed among the Government Department.
- Job opportunity will be increased.
- Able to support their family.
- Future will be moving towards saved.

Sustainability

The sustainability of the project can be measured after the completion of the proposed village development model project as follows:

- The targeted village will have their own organized CBOs / SHGs
- At least 30 families of one village will have a smoke free cooking technology, and save 50% wood from fire and 50% reduction in gas emissions
- The targeted villages are using a safe drinking water through the construction of Bio—Sand Nadi filter units at their house hold level.
- Women of the each village are able to read and write and empowered to take part in decision making process.
- The (RLF)s revolving loan funds are established in their own village and the recycling process is being started for the communities.
- The targeted village families have a fresh vegetable at household level and are trained to cultivate vegetable at house hold level.
- Useful animal breeds importance and awareness promoted through heifers and goat schemes
- All the villagers of the targeted village are running their village based CBO/SHG and saving on regular basis.
- The sustainable development is initiated to move towards MDG millennium development goals.

In case of any further clarification, please feel free to contact us.

**STRENGTH**
1) Qualified & Quality staff for the projects.
2) Community based Organization with assigned tasks
3) Coordination with INGO’s, NGO’s, GO’s and related organizations.
4) Water testing laboratory facility to monitor water quality biologically & chemically.
5) Community satisfaction through our working.
6) Professional Experts to upgrade the Program activities.
7) Experienced Staff for emergencies.
8) Field offices near to the affected communities, 3 field offices in Sindh, 1 Punjab.
9) Ability to develop the community so that it doesn’t have to rely on funding alone.
10) Different automobile facility which are helpful in program operation.
11) Partners not is our main strength.
12) Sustainable change with SMART formula.

**WEAKNESS**
1) Lack of funds to secure skilled staff.
2) Lack of national & international exposure for staff.
3) Lack of trainings to facilitate communities.
4) Lack of proper space/ building.
5) Lack of resources to implement the programs more effectively.

**OPPORTUNITIES**
1) To engage youth for the development of the community.
2) Strengthen the staff capacity through vocational trainings.
3) Formation of CBO’s for sustainable process at the community level.
4) Enhance the relations with INGO’s & NGO’s to be deemed partnerships.
5) Encourage communities to learn basic techniques / needs.
6) Raise the campaign for the promotion of Safe Clean Drinking water & Fuel Efficient stoves on mass level.

**THREATS**
1) Recurrence of emergencies.
2) Politically instability.
3) Cultural Barriers.
4) Communities in acceptance for involvement of women.
5) Water Shortage.
6) Migration of rural families from one village to another villages.
7) Disasters (floods & cyclones) prominently in Delta region that affects on community development programs.
